

Description of the begin2ride Riding Sessions

If you are a beginner, this is the place to start!

SESSION 1:

Getting Started, Introduction to Beginning Motorcycling:

This Learn-To-Ride session introduces students to motorcycling, and establishes the foundation skills, on which all other skills are built. We practice smooth take-offs, good riding posture, and using the brakes for stopping. We start with orientation and risk management. Then study motorcycle controls; where they are and how to properly use them, specifically when learning to ride. You will be introduced to proper riding posture, shifting and "finding" neutral. Mastery of the throttle roll-on, coordinated with clutch release, for getting underway smoothly, are primary objectives.

We recommend you complete Session 1 before you schedule your written test. You gain riding experience in this session, which helps you better understand and be more successful with the written test questions.

SESSION 2:

Practice Riding and Introduction to Controlling Lean:

We continue to practice the foundation skills learned in the introduction session. We then add the skills of maintaining stability through smooth throttle control for speed adjustment. Next we learn to Lean the motorcycle to control direction. Mastery of controlling direction and smooth speed adjustments are primary objectives.

SESSION 3:

Combination Skills: Introduction to Cornering and Shifting While Moving:

In this session, we continue to practice the foundation skills and leaning skills learned in the previous sessions. We then add the skill of smooth shifting while moving and introduce cornering techniques. Mastery of smooth clutch release and setting entry speed are primary objectives.

Combination Skills are the skills you will need to ride your first bike home from where you buy it!

We recommend completing Session 3 before you have your first motorcycle ride on the street with your restricted license (learners permit).

- * The training motorcycles are late model, light weight with low seats.
- * We provide the helmets, expert instructors and an enjoyable learning environment for beginners.
- * Learn the physical skills needed to ride your first bike home!.
- * Our 3 hour riding sessions provide "hands-on" training for brand new riders.
- * We have been teaching people to ride motorcycles at our Kearny Mesa facility for over 20 years.
- * Call (858) 874-5888 to reserve a seat. We accept credit cards & debit cards.
